You Pick the Breed, Gender & Genetics

SexedULTRA™
High Fertility Sex-Sorted Semen

Conception rates comparable to conventional semen

Cows that have back-to-back heifer calves produce up to 445 Kg’s more milk over the two lactations than cows calving two males

4% fewer difficult calvings reduces stress and improves cow comfort

Extra value
Accelerate genetic improvement and produce more replacement heifers

For best result, delay breeding 4-8 hours

The best way to predict the future is to
Create It

Ask your semen dealer how you can get Sexed Semen or contact:
