Territory is the featured lot 1 from the 2018 SAV sale proclaimed by Kelly Schaff as the greatest Resource son ever produced at SAV. Early reports of his first calf crop have been outstanding, with Territory calves being some of the early standouts in the SAV program this spring. His Density dam has been a favorite at SAV since a calf and is now working in their ET program. She is especially strong for foot and udder quality and has a 104 weaning ratio on her first three calves. His granddam is the dam of SAV Thunderbird. Currently, he’s being used heavily to carry forth the Resource lineage in the Schaff program.
